## 1

### Geotechnical Properties of Soil 1

- 1.1 Introduction 1
- 1.2 Grain-Size Distribution 2
- 1.3 Size Limits for Soils 5
- 1.4 Weight–Volume Relationships 5
- 1.5 Relative Density 9
- 1.6 Atterberg Limits 12
- 1.7 Soil Classification Systems 13
- 1.8 Hydraulic Conductivity of Soil 17
- 1.9 Steady-State Seepage 19
- 1.10 Effective Stress 21
- 1.11 Consolidation 25
- 1.12 Calculation of Primary Consolidation Settlement 30
- 1.13 Time Rate of Consolidation 32
- 1.14 Shear Strength 37
- 1.15 Unconfined Compression Test 42
- 1.16 Correlations for Undrained Shear Strength,  $c_u$  43
- 1.17 Sensitivity 45
- Problems 45
- References 48

## 2

### Subsurface Exploration 49

- 2.1 Introduction 49
- 2.2 Subsurface Exploration Program 49
- 2.3 Exploratory Borings in the Field 52
- 2.4 Procedures for Sampling Soil 56
- 2.5 Observation of Water Tables 64

- 2.6 Vane Shear Test 65
- 2.7 Cone Penetration Test 68
- 2.8 Coring of Rocks 73
- 2.9 Preparation of Boring Logs 74
- 2.10 Subsoil Exploration Report 76
- Problems 77
- References 79

3 Shallow Foundations 81

- 3.1 Introduction 81
- Ultimate Bearing Capacity of Shallow Foundations* 81
- 3.2 General Concept 81
- 3.3 Terzaghi's Bearing Capacity Theory 84
- 3.4 Factor of Safety 88
- 3.5 Modification of Bearing Capacity Equations for Water Table 90
- 3.6 The General Bearing Capacity Equation 91
- 3.7 Eccentrically Loaded Foundations 96
- 3.8 Bearing Capacity of Layered Soils: Stronger Soil Underlain by Weaker Soil 99
- Settlement of Shallow Foundations* 106
- 3.9 Types of Foundation Settlement 106
- 3.10 Elastic Settlement Based on the Theory of Elasticity 106
- 3.11 Elastic Settlement of Foundations on Saturated Clay 116
- 3.12 Elastic Settlement of Sandy Soil: Use of Strain Influence Factor 117
- 3.13 Range of Material Parameters for Computing Elastic Settlement 118
- Primary Consolidation Settlement* 121
- 3.14 Primary Consolidation Settlement Relationships 121
- 3.15 Three-Dimensional Effect on Primary Consolidation Settlement 122
- 3.16 Vertical Stress Increase in a Soil Mass Caused by Foundation Load (For Consolidation Settlement Calculation) 125
- 3.17 Allowable Bearing Pressure in Sand Based on Settlement Consideration 136
- 3.18 Field Load Test 136
- 3.19 Presumptive Bearing Capacity 138
- 3.20 Tolerable Settlement of Buildings 138
- Problems 141
- References 144

4 Mat Foundations 147

- 4.1 Introduction 147
- 4.2 Combined Footings 147
- 4.3 Common Types of Mat Foundations 150

- 4.4 Bearing Capacity of Mat Foundations 152
- 4.5 Compensated Foundations 155
- 4.6 Structural Design of Mat Foundations 159
- Problems 176
- References 178

5 Lateral Earth Pressure and Retaining Walls 179

- 5.1 Introduction 179
- Lateral Earth Pressure* 180
- 5.2 Lateral Earth Pressure at Rest 180
- 5.3 Rankine Active Earth Pressure 183
- 5.4 Rankine Active Earth Pressure for Inclined Backfill 190
- 5.5 Coulomb's Active Earth Pressure 190
- 5.6 Rankine Passive Earth Pressure 194
- 5.7 Rankine Passive Earth Pressure: Inclined Backfill 201
- 5.8 Coulomb's Passive Earth Pressure 202
- 5.9 Comments on the Failure Surface Assumption for Coulomb's Pressure Calculations 203
- Stability of Retaining Walls* 205
- 5.10 Proportioning Retaining Walls 205
- 5.11 Application of Lateral Earth Pressure Theories to Design 206
- 5.12 Equivalent Fluid Method for Determination of Earth Pressure 208
- 5.13 Stability of Retaining Walls 210
- 5.14 Check for Overturning 213
- 5.15 Check for Sliding along the Base 215
- 5.16 Check for Bearing Capacity Failure 217
- 5.17 Construction Joints and Drainage from Backfill 226
- Problems 228
- References 231

6 Sheet Pile Walls 232

- 6.1 Introduction 232
- 6.2 Construction Methods 236
- 6.3 Cantilever Sheet-Pile Walls 237
- 6.4 Cantilever Sheet Piling Penetrating Sandy Soils 238
- 6.5 Cantilever Sheet Piling Penetrating Clay 244
- 6.6 Anchored Sheet-Pile Walls 249
- 6.7 Free Earth Support Method for Penetration of Sandy Soil 250
- 6.8 Moment Reduction for Anchored Sheet-Pile Walls 252
- 6.9 Free Earth Support Method for Penetration of Clay 256
- 6.10 Anchors 260
- 6.11 Ultimate Resistance of Anchor Plates and Beams in Sand 262

- 6.12 Ultimate Resistance of Anchor Plates and Beams in Clay  
 $\phi = 0$  (Condition) 265
- 6.13 Factor of Safety for Anchor Plates and Beams 265
- Problems 267
- References 270

## 7

## Braced Cuts 271

- 7.1 Introduction 271
- 7.2 Lateral Earth Pressure in Braced Cuts 271
- 7.3 Design of Various Components of a Braced Cut 276
- 7.4 Stability of Braced Cuts 281
- 7.5 Failure of Single Wall Cofferdams by Piping 286
- Problems 291
- References 292

## 8

## Pile Foundations 293

- 8.1 Introduction 293
- 8.2 Types of Pile in Use 295
- 8.3 Estimation of Pile Length 302
- 8.4 Installation of Piles 306
- 8.5 Load Transfer Mechanism 309
- 8.6 Equations for Estimating Pile Capacity 310
- 8.7 Meyerhof's Method for Estimating  $Q_p$  312
- 8.8 Janbu's Method for Estimating  $Q_p$  314
- 8.9 Coyle and Castello's Method for Estimating  $Q_p$  in Sand 316
- 8.10 Other Correlations for Calculating  $Q_p$  with SPT and CPT Results 316
- 8.11 Frictional Resistance ( $Q_s$ ) in Sand 317
- 8.12 Frictional (Skin) Resistance in Clay 320
- 8.13 General Comments and Allowable Pile Capacity 323
- 8.14 Point-Bearing Capacity of Piles Resting on Rock 323
- 8.15 Elastic Settlement of Piles 329
- 8.16 Laterally Loaded Piles 333
- 8.17 Pile-Driving Formulas 340
- 8.18 Group Piles—Efficiency 344
- 8.19 Consolidation Settlement of Group Piles 349
- Problems 352
- References 355

## 9

## Drilled Shafts 357

- 9.1 Introduction 357
- 9.2 Types of Drilled Shafts 358
- 9.3 Construction Procedures 359
- 9.4 Other Design Considerations 361
- 9.5 Estimation of Load-Bearing Capacity—General 363

- 9.6 Drilled Shafts in Sand—Load-Bearing Capacity 364
- 9.7 Drilled Shafts in Clay—Load-Bearing Capacity 373
- 9.8 Lateral Load-Carrying Capacity 379
- Problems 379
- References 382

## 10

## Foundations on Difficult Soils 383

- 10.1 Introduction 383
- Foundations on Collapsing Soil* 383
- 10.2 Definition and Types of Collapsing Soil 383
- 10.3 Physical Parameters for Identification 384
- 10.4 Procedure for Calculation of Collapse Settlement 387
- 10.5 Foundation Design in Soils Not Susceptible to Wetting 388
- 10.6 Foundation Design in Soils Susceptible to Wetting 390
- Foundations on Expansive Soil* 390
- 10.7 Expansive Soils—General 390
- 10.8 Laboratory Measurement of Swell 392
- 10.9 Classification of Expansive Soil 396
- 10.10 Foundation Considerations on Expansive Soils 396
- 10.11 Construction on Expansive Soils 397
- Sanitary Landfills* 402
- 10.12 Sanitary Landfills—General 402
- 10.13 Settlement of Sanitary Landfills 403
- 10.14 Bearing Capacity of Foundations on Sanitary Landfills 405
- Problems 406
- References 407

## 11

## Soil Improvement 408

- 11.1 Introduction 408
- 11.2 Compaction—General Principles 409
- 11.3 Field Compaction 411
- 11.4 Vibroflotation 416
- 11.5 Precompression—General Considerations 420
- 11.6 Sand Drains 425
- 11.7 Wick Drains 429
- 11.8 Soil Stabilization by Admixtures 429
- Problems 435
- References 436

Answers to Selected Problems 437

Index 441
