

Current Developments in Biotechnology and Bioengineering

Emerging Organic Micro-pollutants

Editors
Sunita Varjani, Ashok Pandey, R. D. Tyagi,
Huu Hao Ngo and Christian Larroche

Contents

<i>Contributors</i>	xv
<i>Editors Biography</i>	xix
<i>Preface</i>	xxi

Chapter 1: Sustainable management and treatment technologies for micro-pollutants in wastewater..... 1

Huu Hao Ngo, Hoang Nhat Phong Vo, Wenshan Guo, Zhuo Chen, Yi Liu, Sunita Varjani

1 Introduction.....	1
2 Occurrence of micro-pollutants in wastewater.....	3
3 Appropriate technologies for removal of micro-pollutants in wastewater.....	5
3.1 Micro-pollutants in aqueous phase.....	6
3.2 Micro-pollutants in solid phase.....	11
4 Transformation and metabolites of micro-pollutants in wastewater.....	12
5 Management policy for sustainable micro-pollutant treatment.....	15
5.1 Current standards for micro-pollutant pollution management.....	15
5.2 Life-cycle assessment.....	16
5.3 Health risk assessment.....	16
6 Conclusions and perspectives.....	17
References.....	18
Further reading.....	22

Chapter 2: Occurrence and human health risk of micro-pollutants—A special focus on endocrine disruptor chemicals..... 23

Sunita Varjani, M. Chaithanya Sudha

1 Introduction.....	23
2 Sources of ED exposure.....	25
2.1 Issues related to EDs.....	26
3 Methods of identifying EDs.....	27
3.1 Metabolism of EDs.....	28
4 Risk associated with EDs.....	29
5 Toxicity test methods.....	30
5.1 Acute toxicity test.....	30
5.2 Subchronic toxicity test.....	30

5.3 Chronic toxicity test.....	34
5.4 Mutagenicity tests.....	34
6 Research studies on EDs.....	35
7 Regulations related to emerging microcontaminants.....	35
8 Conclusions and perspectives.....	37
References.....	38
Further reading.....	39

Chapter 3: Micro-pollutants in surface water: Impacts on the aquatic environment and treatment technologies.....41

N. Manoj Kumar, M. Chaithanya Sudha, T. Damodharam, Sunita Varjani

1 Introduction.....	41
2 Occurrence of micro-pollutants in water.....	42
3 Urban sources of micro-pollutants.....	43
4 Bioaccumulation of micro-pollutants in aquatic systems.....	44
5 Mitigation of aqueous micro-pollutants.....	46
6 Developments in analytical methodology.....	47
7 Toxicity of micro-pollutants.....	48
8 Treatment techniques for the removal of micro-pollutants.....	50
8.1 Adsorption.....	51
8.2 Ozonation.....	51
8.3 Membrane processes.....	52
8.4 Advanced oxidation processes.....	52
9 Preventive management of water quality.....	56
10 Conclusions and perspectives.....	57
References.....	58
Further reading.....	62

Chapter 4: Methods for the analysis of micro-pollutants.....63

M.B. Ahmed, M.A.H. Johir, Huu Hao Ngo, Wenshan Guo, J.L. Zhou, D. Belhaj, M.A. Moni

1 Introduction.....	63
2 Sample preparation for micro-pollutant analysis.....	65
3 Methods for analysis of micro-pollutants.....	66
3.1 FTIR analysis of micro-pollutants.....	67
3.2 Raman spectroscopic analysis of micro-pollutants.....	71
3.3 UV-Vis spectroscopic analysis of micro-pollutants.....	72
3.4 HPLC-UV/fluorescence for the detection of micro-pollutants.....	72
3.5 LC-MS/LC-MS-MS detection of micro-pollutants.....	74
3.6 GC-MS/GC-MS-MS analysis of micro-pollutants.....	78
3.7 NMR spectroscopic analysis of micro-pollutants.....	79
4 Challenges to analyzing emerging micro-pollutants.....	81
5 Conclusions and perspectives.....	82
References.....	83

Chapter 5: Constructed wetlands for the removal of organic micro-pollutants.....87

Rajwinder Kaur, Anita Talan, Bhagyashree Tiwari, Sridhar Pilli, Balasubramanian Sellamuthu, R.D. Tyagi

1 Introduction.....	88
2 Organic micro-pollutant removal in constructed wetlands.....	89
2.1 Micro-pollutants: Sources, fate, and their effect on the environment.....	89
2.2 Policy in various countries regarding micro-pollutants.....	93
3 Treatment of water/wastewater containing micro-pollutants.....	98
3.1 Various treatment methods.....	98
3.2 Constructed wetlands.....	102
4 Influencing parameters and treatment efficiency of constructed wetlands.....	107
4.1 Role of plants in constructed wetlands.....	108
4.2 Mechanism of micro-pollutant removal by plants in constructed wetlands.....	113
4.3 Engineering parameters (configurations).....	114
4.4 Operating conditions.....	118
5 Performance of full-scale constructed wetlands.....	126
5.1 Surface flow constructed wetland for secondary effluent treatment.....	126
5.2 Surface flow constructed wetland under anoxic conditions.....	128
5.3 Hybrid constructed wetlands.....	128
5.4 Multistage surface flow constructed wetlands.....	129
5.5 Performance of constructed wetlands in Canada.....	129
5.6 Performance of constructed wetlands in China.....	130
5.7 Performance of constructed wetlands in Germany.....	131
5.8 Lagoon wetland in Louisiana, USA.....	131
6 Conclusions and perspectives.....	133
References.....	134

Chapter 6: Multibarrier approach for the removal of organic micro-pollutants.....141

S.K. Ram, H. Panidepu, V. Cheernam, R.D. Tyagi

1 Introduction.....	141
2 What is the multibarrier approach?.....	142
2.1 Source water protection.....	143
2.2 Water treatment.....	144
2.3 Water quality monitoring and distribution networks.....	147
3 Process design and policies as additional barriers against micro-pollutants.....	151
3.1 Process design considerations.....	151
3.2 Policy design and management.....	152
4 Importance of the multibarrier approach: Case study of the New Zealand outbreak.....	155
5 Conclusions and perspectives.....	156
References.....	158

Chapter 7: Heterogeneous photocatalysis for the removal of pharmaceutical compounds.....	161
Duy Ngoc Nguyen, Ha Manh Bui, Hien Quoc Nguyen	
1 Introduction.....	161
2 Pharmaceuticals in the environment.....	162
3 Photocatalytic process.....	164
3.1 Photocatalytic mechanism.....	164
3.2 Affecting parameters of photocatalysis.....	167
3.3 Methods for improving photocatalytic activity.....	169
3.4 Photocatalytic application for eliminating pharmaceutical compounds.....	175
4 Conclusions and perspectives.....	176
References.....	178
Chapter 8: Biotransformation of organic micro-pollutants in biological wastewater.....	185
Huu Hao Ngo, Dongle Cheng, Wenshan Guo, Ashok Pandey, Duu-Jong Lee, Lijuan Deng	
1 Introduction.....	185
2 Removal of OMPs in biological treatment processes.....	188
3 Biotransformation of OMPs in aerobic treatment processes.....	189
4 Biotransformation of OMPs in anaerobic treatment processes.....	193
5 Influence of operating parameters on the biotransformation of OMPs.....	196
5.1 Influence of SRT.....	196
5.2 Influence of HRT.....	196
5.3 Influence of pH.....	197
5.4 Influence of temperature.....	197
5.5 Influence of biotransformable substrates.....	198
6 Conclusions and perspectives.....	199
References.....	199
Chapter 9: Modeling organic pollutant degradation kinetics.....	205
H. Panidepu, S.K. Ram, V. Cheernam, R.D. Tyagi	
1 Introduction.....	205
2 The modeling philosophy.....	206
2.1 Single media versus multiple models.....	206
2.2 Distributed versus lumped models.....	207
2.3 Steady-state models versus dynamic models.....	207
2.4 Stochastic versus deterministic.....	207
2.5 Eulerian model versus Lagrangian model.....	207
2.6 Numerical versus analytical methods.....	208
2.7 Zero-, first-, and second-order kinetics.....	209
3 Biodegradation.....	210
3.1 Biodegradation by growing microbes.....	211
3.2 Popular kinetic models.....	217

4 Applications of kinetic modeling.....	221
4.1 Beddington-De Angelis kinetics.....	221
4.2 Modeling biofilters.....	223
4.3 Modeling cometabolism.....	225
4.4 QSAR models.....	225
4.5 Dynamic models.....	226
4.6 Raceway pond reactor models.....	227
5 Conclusions and perspectives.....	228
References.....	229
Chapter 10: Membrane bioreactors for the removal of micro-pollutants.....	231
Nirenkumar Pathak, Van Huy Tran, Sherub Phuntsho, Hok Yong Shon	
1 Introduction.....	231
1.1 Occurrence, fate, and transport of OMPs in wastewater treatment plants and the impact on humans and the environment.....	232
1.2 Legislation framework and OMPs.....	233
1.3 Conventional activated sludge process versus membrane bioreactor.....	234
2 MBR performance in wastewater treatment.....	235
2.1 MBR configuration.....	239
3 Factors affecting OMP removal by MBR.....	241
3.1 Physicochemical properties of OMPs.....	241
3.2 Operating parameters.....	244
4 Limitations and challenges of MBRs.....	248
5 Conclusions and perspectives.....	248
References.....	249
Further reading.....	252
Chapter 11: Membrane distillation for the removal of micro-pollutants.....	253
Tanaji T. More, R.D. Tyagi	
1 Introduction.....	253
2 Why use MD for micro-pollutant removal?.....	255
3 Membrane distillation.....	259
3.1 Concept.....	259
3.2 Configurations.....	260
3.3 Membranes.....	261
3.4 Membrane module.....	262
3.5 Operating parameters.....	263
4 MD applications for micro-pollutant removal.....	263
4.1 Textile wastewater.....	263
4.2 Pharmaceuticals.....	270
4.3 Pesticides.....	271
4.4 Heavy metals and metalloids.....	272
4.5 Radioactive elements.....	273
5 Membrane fouling.....	274
6 Economic and energy requirements.....	274

7 Conclusions and perspectives.....	275
Acknowledgments.....	276
References.....	276
Chapter 12: Removal of organic micro-pollutants by membrane filtration.....	281
D. Roy, A. Khosravanipour Mostafazadeh, Patrick Drogué, R.D. Tyagi	
1 Introduction.....	281
2 Retention and permeation mechanisms in membrane separation processes.....	282
2.1 OMPs separation mechanisms.....	283
2.2 OMP permeation mechanisms.....	288
2.3 External factors influencing separation mechanisms.....	289
2.4 Summary.....	290
3 Direct applications of membrane filtration systems.....	292
3.1 Microfiltration and ultrafiltration.....	292
3.2 Nanofiltration and reverse osmosis.....	295
3.3 Forward osmosis.....	297
4 Integrated systems.....	299
4.1 MF and UF as a tertiary treatment.....	299
4.2 Membrane bioreactor.....	300
5 Conclusions and perspectives.....	303
References.....	305
Chapter 13: Advanced oxidation processes for the removal of pesticides.....	309
Thien Huu Pham, Ha Manh Bui, Thanh Xuan Bui	
1 Introduction to pesticide compounds.....	309
1.1 Definition.....	309
1.2 Classification.....	309
1.3 Toxicity.....	311
2 Advanced oxidation processes.....	312
2.1 Principle.....	312
2.2 Advanced oxidation chemical processes.....	316
2.3 Advanced photochemical oxidation processes.....	317
2.4 Advanced catalytic oxidation processes.....	319
2.5 Other advanced oxidation processes.....	321
2.6 Nonthermal plasma technology for degradation of pesticides in water.....	321
3 Conclusions and perspectives.....	327
References.....	327
Chapter 14: Retention of organic micro-pollutants by sorption processes.....	331
Filomena Costa, Ana Lago, Óscar Barros, Verónica Rocha, Ziva Vipotnik, Bruna Silva Teresa Tavares	
1 Introduction.....	331
2 A general overview on the sorption processes.....	334
2.1 Sorbents: From designed materials to the use of wastes.....	335
2.2 Sorption of micro-pollutants during biological wastewater treatment.....	338

3 Ecological and economic benefits from the usage of low-cost and green sorbents in the short and long term.....	343
4 Critical assessment regarding the sorption processes—What remains to be done.....	344
4.1 Experimental design.....	346
4.2 Data interpretation.....	347
4.3 Researcher approach.....	347
5 Conclusions and perspectives.....	348
Acknowledgments.....	350
References.....	350
Further reading.....	362
Chapter 15: Removal of organic micro-pollutants using filamentous fungi.....	363
Gülru Bulkan, Jorge A. Ferreira, Mohammad J. Taherzadeh	
1 Introduction.....	363
2 Micro-pollutants.....	365
3 Major sources of micro-pollutants.....	366
4 Advanced treatment methods for micro-pollutants.....	370
5 Removal mechanisms of micro-pollutants in filamentous fungi.....	371
5.1 Whole-cell system.....	372
5.2 Mechanisms involving extra- and intercellular enzymes.....	372
5.3 Other mechanisms.....	376
5.4 Whole-cell systems—Examples of application.....	376
5.5 Removal of micro-pollutants using isolated enzymes.....	385
6 Integration of filamentous fungi with further purification strategies.....	387
7 Products from filamentous fungi.....	388
8 Conclusions and perspectives.....	389
Acknowledgments.....	390
References.....	390
Chapter 16: Removal of organic micro-pollutants by anaerobic microbes and enzymes.....	397
Lorena Gonzalez-Gil, Marta Carballa, Juan M. Lema	
1 Introduction.....	397
1.1 Upcoming legislation on OMPs.....	398
1.2 Removal of OMPs in sewage treatment plants.....	398
2 Removal of OMPs in anaerobic treatment technologies.....	400
2.1 Removal efficiencies of OMPs.....	401
2.2 Removal mechanisms: Sorption and biotransformation.....	406
3 Factors governing the biotransformation of OMPs.....	408
3.1 Chemical structure of the compounds.....	408
3.2 Operating parameters.....	408
3.3 Bioavailability of OMPs and reversibility of enzymatic reactions.....	410
3.4 Reactor configuration.....	411

4 Microbial populations and enzymes involved in the anaerobic biotransformation of OMPs.....	412
4.1 Anaerobic populations involved in OMP biotransformation.....	414
4.2 Enzymes involved in the anaerobic biotransformation of OMPs.....	416
5 Conclusions and perspectives.....	419
Acknowledgments.....	420
References.....	420
Further reading.....	426

Chapter 17: Degradation of organic micro-pollutants by ultraviolet radiation.....427

Bhoomika Yadav, B. Sellamuthu, R.D. Tyagi

1 Introduction.....	427
2 Micro-pollutants present in wastewater influent and in treated water/natural water sources.....	429
3 Disadvantages of conventional methods in micro-pollutant removal.....	432
4 UV-based AOPs.....	433
4.1 Degradation of various micro-pollutants.....	435
4.2 Ozone combined with UV.....	436
4.3 Processes with H ₂ O ₂	438
4.4 UV/Fenton process.....	442
4.5 Combination of titanium dioxide (TiO ₂) with UV.....	443
4.6 Other processes involving UV.....	445
4.7 Disadvantages and limitations of UV-based AOPs.....	446
5 UV degradation case studies.....	448
5.1 Effectiveness and degradation by UV.....	448
5.2 Fast photocatalytic degradation of BPA.....	449
6 Economic assessment and industrial application of UV-based AOPs.....	450
7 Conclusions and perspectives.....	451
References.....	452

Chapter 18: Removal of emerging micro-pollutants from pharmaceutical industry wastewater.....457

Bhagyashree Tiwari, Patrick Drogui, R.D. Tyagi

1 Introduction.....	457
2 Overview of pharmaceutical manufacturing processes.....	460
2.1 Fermentation.....	460
2.2 Chemical synthesis.....	461
2.3 Biological/natural extraction of pharmaceuticals.....	462
2.4 Mixing or formulation.....	463
2.5 Novel approaches for pharmaceutical production.....	463
3 Treatment of pharmaceutical industry wastewater.....	464
3.1 Biological treatment.....	465
3.2 Physiochemical treatment.....	469
3.3 Advance oxidation process.....	471
3.4 Combination of biological treatment and advance oxidation process.....	475

4 Conclusions and perspectives.....	476
References.....	478

Chapter 19: Ecotoxicological effects of organic micro-pollutants on the environment.....481

Krishna Gautam, Sadasivam Anbumani

1 Introduction.....	481
2 Microplastics.....	483
3 Pharmaceuticals and personal care products.....	487
4 Polycyclic aromatic hydrocarbons.....	490
5 Regulation and policymaking for OMPs.....	492
6 Conclusions and perspectives.....	493
References.....	494

Chapter 20: Removal of contaminants of emerging concern by microalgae-based wastewater treatments and related analytical techniques.....503

A. Agüera, P. Plaza-Bolaños, F. G. Ación Fernández

1 Introduction.....	503
2 Wastewater treatment with microalgae-based systems.....	506
3 Analytical strategies applied to the identification and monitoring of CECs in wastewater treatments.....	508
3.1 Sample enrichment and cleanup.....	509
3.2 Quantitative target analysis.....	510
3.3 Suspect screening strategies.....	512
3.4 Nontarget analysis: TP identification.....	514
4 Removal of CECs in microalgae-based treatment systems.....	515
5 Conclusions and perspectives.....	519
References.....	521

Chapter 21: Nanofiltration and reverse osmosis processes for the removal of micro-pollutants.....527

Weilong Song, Lai Yoke Lee, How Yong Ng

1 Introduction.....	527
2 NF and RO on micro-pollutant removal.....	529
3 Factors affecting micro-pollutant removal in NF and RO.....	533
3.1 Membrane characteristics.....	533
3.2 Matrix characteristics.....	538
3.3 Membrane operating conditions.....	543
3.4 Prediction models.....	545
4 Conclusions and perspectives.....	547
References.....	548

Index.....553
