

ADVANCED TEXTBOOK SERIES

Earth's Natural Hazards and Disasters

Bethany D. Hinga

AGU ADVANCING
EARTH AND
SPACE SCIENCES

WILEY

Contents

Contributors	<i>xiii</i>
Preface	<i>xv</i>
Glossary	<i>xvii</i>
Acknowledgments	<i>xliv</i>
1 Introduction to Natural Disasters	<i>1</i>
<i>Bethany D. Hinga</i>	
1.1 Introduction	<i>1</i>
1.2 The Earth System	<i>4</i>
1.3 Natural Disasters	<i>7</i>
1.3.1 Types of Disasters	<i>7</i>
1.4 Definitions	<i>8</i>
1.5 Disasters Are Predictable	<i>9</i>
1.6 The Human Factor	<i>13</i>
1.7 Increasing Risk	<i>14</i>
1.8 Calculated Risks	<i>16</i>
1.9 The Role of Government in Vulnerability and Preparing for Disasters	<i>18</i>
1.10 Disasters and Social Change	<i>21</i>
1.11 Community Response	<i>21</i>
1.11.1 Before the Disaster	<i>21</i>
1.11.2 After the Disaster	<i>24</i>
1.11.3 Creating Resilience in Disaster Survivors	<i>24</i>
1.12 Chapter in Review	<i>25</i>
Part I Geologic Events as Hazards	
2 Plate Tectonics	<i>31</i>
<i>Bethany D. Hinga</i>	
2.1 Introduction	<i>31</i>
2.2 Continental Drift	<i>31</i>
2.3 New Data: Magnetism	<i>35</i>
2.4 Seafloor Spreading	<i>38</i>
2.5 Plate Tectonics	<i>38</i>
2.6 Earth Structure	<i>38</i>
2.7 Plate Boundaries	<i>40</i>
2.7.1 Plate Boundary Types	<i>40</i>

2.7.2	Divergent Boundaries	40
2.7.3	Convergent Boundaries	45
2.8	Subduction Zones	45
2.8.1	Continental-Oceanic Subduction Zones	45
2.8.2	Oceanic-Oceanic Subduction	47
2.9	Collision Zones	48
2.10	Transform Boundaries	49
2.11	Hotspots	51
2.12	Conclusion	54
2.13	Chapter in Review	54
3	Volcanoes	57
	<i>Bethany D. Hinga</i>	
3.1	A Lengthy Eruption With an Unexpected End	57
3.2	Magma Generation	64
3.2.1	Eruption of Magma	66
3.3	Volcano Behavior	70
3.4	Types of Volcanoes	72
3.4.1	Shield Volcanoes	72
3.4.2	Cinder Cones	79
3.4.3	Composite Volcanoes, Stratovolcanoes, or Composite Cones	83
3.5	The Case of Mount St. Helens	83
3.6	Hazards of Composite Volcanoes	90
3.7	Mitigation	96
3.8	Chapter in Review	97
4	Earthquakes	101
	<i>Bethany D. Hinga</i>	
4.1	Introduction	101
4.2	What Is an Earthquake?	107
4.3	Seismic Waves	111
4.3.1	Use of Seismic Waves	114
4.3.2	Additional Capabilities of Seismology	118
4.4	How Do Earthquakes Work?	123
4.4.1	Types of Faults	126
4.5	Earthquake Hazards	129
4.5.1	Aftershocks	130
4.5.2	Structure Collapse	131
4.5.3	Fire	133
4.5.4	Amplification of Ground Motion	133
4.5.5	Liquefaction	134
4.5.6	Landslides and Other Earth Movements	135
4.5.7	Dam Failure	136
4.5.8	Tsunamis and Seiches	137
4.6	Prince William Sound Earthquake	138
4.7	Mitigation Strategies	139
4.8	Conclusion	142
4.9	Chapter in Review	142

5	Tsunamis	145
	<i>Bethany D. Hinga</i>	
5.1	Introduction	145
5.2	Unimak Island Earthquake and Tsunami, 1946	145
5.3	Wave Creation	149
5.4	Wave Characteristics	150
5.5	Wave Parameters	152
5.6	Case Studies	153
5.6.1	Earthquake-Generated Tsunamis	153
5.7	Landslide-Generated Tsunami	161
5.8	Mega-Tsunamis	161
5.9	Volcano-Generated Tsunamis	161
5.10	Mitigation of Tsunami Hazards	164
5.11	Conclusion	166
5.12	Chapter in Review	166
6	Earth Movements	169
	<i>Bethany D. Hinga</i>	
6.1	The Role of Gravity in Shaping the Earth	169
6.2	Venezuela, 1999	169
6.3	Types of Earth Movements	172
6.3.1	Creep	173
6.3.2	Rock Falls	174
6.3.3	Slides	175
6.3.4	Slumps	179
6.3.5	Slump to Flow	181
6.3.6	Debris Flows	181
6.3.7	Flows	183
6.3.8	Subsidence	183
6.4	Mass-Wasting Triggers	188
6.5	Mitigation of Hazards	188
6.6	Conclusion	192
6.7	Chapter in Review	193

Part II Weather and Climate as Hazards

7	Atmosphere and Weather	197
	<i>Bethany D. Hinga</i>	
7.1	Introduction	197
7.2	The Earth's Atmosphere	197
7.3	Solar Radiation	199
7.4	Weather	202
7.4.1	Weather Measurements	202
7.4.2	Planetary Air Circulation Patterns and the Coriolis Effect	207
7.4.3	Surface Circulation of the Atmosphere	211
7.5	Air Masses and Fronts	212
7.6	High and Low Pressure Systems	214
7.7	Conclusion	217
7.8	Chapter in Review	217

8	Severe Weather	221
	<i>Bethany D. Hinga</i>	221
8.1	Blizzard on the Plains	221
8.2	Severe Weather Events	225
8.2.1	Heat Waves	225
8.2.2	Drought	227
8.2.3	Winter Storms	230
8.2.4	Polar Vortex	232
8.2.5	Thunderstorms	234
8.2.6	Thunderstorm Hazards	239
8.3	Conclusion	251
8.4	Chapter in Review	252
9	Floods	255
	<i>Bethany D. Hinga</i>	255
9.1	Introduction	255
9.2	Central China Flood	255
9.3	The Nature of Streams	258
9.3.1	Stream Parameters	259
9.3.2	Procedure for Calculating Recurrence Interval and Flood Probability	262
9.3.3	Stream Shapes	263
9.4	Types of Floods	265
9.4.1	Flash Floods	265
9.4.2	River Floods	268
9.4.3	Storm Surge	271
9.4.4	Coastal Floods	272
9.4.5	Inland Flooding	273
9.5	Flood Mitigation	274
9.6	Chapter in Review	278
10	Hurricanes	281
	<i>Bethany D. Hinga</i>	281
10.1	Introduction	281
10.2	Hurricane Maria, 2017	281
10.3	Tropical Cyclones	287
10.3.1	Requirements for Tropical Cyclone Formation	287
10.3.2	Life Cycle of a Tropical Cyclone	290
10.3.3	Wind Speed Variations Within the Storm	294
10.4	Hurricane Hazards	295
10.4.1	Heavy Rains and Inland Flooding	295
10.4.2	Storm Surge	298
10.4.3	Hurricane Katrina	299
10.4.4	High Winds	303
10.4.5	Tornadoes	303
10.5	Mitigation	304
10.6	Conclusion	304
10.7	Chapter in Review	305

11	Climate Change	307
	<i>Jillian Gregg and John Helms</i>	
11.1	Slushballs and Greenhouses: What the Geologic Record Says About Paleoclimate Compared to the Current Stable Climate That Has Supported Human Civilization Over the Past 10,000 Years	307
11.1.1	Slushballs and Greenhouses	307
11.1.2	Current Stable Climate	307
11.2	Climate Change Basics	310
11.2.1	Climate Versus Weather	310
11.2.2	The Earth Is Warming	310
11.2.3	Greenhouse Gases Are Increasing and They Trap Heat in the Atmosphere	314
11.2.4	The Greenhouse Effect	314
11.2.5	The Earth's Temperature Is Controlled by the Balance of Incoming Solar Radiation, Albedo, and the Greenhouse Effect	319
11.2.6	Greenhouse Gases Have Caused Warming Over the Past Century	324
11.2.7	Greenhouse Gases as the Primary Driver of the Earth's Temperature	326
11.2.8	Earth's Temperatures Have Also Been Correlated With CO ₂ Concentrations Over Geologic History	328
11.2.9	Earth's Current Rise in CO ₂ Is From Humans Burning Fossil Fuels Not From Natural Factors	330
11.2.10	Projected Average Global Temperatures by 2100 and Beyond	334
11.3	Natural Hazards Caused Directly and Indirectly by Greenhouse Gas Emissions and Climate Change	334
11.3.1	Climate Change Impacts	334
11.4	Ocean Impacts	351
11.4.1	Coral Bleaching	351
11.4.2	Ocean Acidification	352
11.4.3	Slowing of the Great Ocean Conveyor Belt	353
11.4.4	El Niño and La Niña	354
11.4.5	Distribution, Current Status, and Projections	356
11.5	Mitigation of Hazards	356
11.5.1	Mitigation	358
11.5.2	Carbon Sequestration via the Biological Carbon Cycle	359
11.6	Geoengineering	361
11.6.1	Radically Altering the Carbon Cycle	361
11.7	Adaptation	363
11.7.1	Building Prohibition and Buyouts	364
11.7.2	Storm Surge Barriers	364
11.7.3	Water Restrictions	365
11.8	Chapter in Review	365
12	Wildland Fires	369
	<i>Bethany D. Hinga</i>	
12.1	Introduction	369
12.1.1	The Camp Fire, 2018	369
12.2	Fire Basics	372
12.2.1	Combustion	372

12.2.2	Heat Transfer	374
12.2.3	The Fire Triangle	375
12.3	Fire Behavior	375
12.3.1	Fuels	376
12.3.2	Weather	377
12.3.3	Topography	381
12.4	Firefighting in Public Lands	382
12.5	Mitigation of Fire Hazards	386
12.6	Conclusion	387
12.7	Chapter in Review	387

Part III Other Hazards

13 Biological Hazards With COVID-19 Case Study 393

Anni Moore and Austin Nuxoll

13.1	Biological Disasters	393
13.1.1	Case Study: COVID-19	393
13.1.2	What Are Coronaviruses?	394
13.1.3	What Symptoms Are Associated With SARS-CoV-2?	395
13.1.4	Epidemiology	395
13.1.5	Origins	396
13.1.6	Vaccines	396
13.2	Introduction to Microbes	397
13.3	Types of Microbes	398
13.3.1	Pathogen, Host, and Vector	398
13.3.2	Endemic, Epidemic, and Pandemic	399
13.3.3	Multicellular Parasites	399
13.3.4	Case Study: The Comeback of a Hookworm	400
13.3.5	Protozoans	400
13.3.6	Case Study: Leishmaniasis	401
13.3.7	Fungi	402
13.3.8	Case Study: Chestnut Blight	404
13.3.9	Archaea	404
13.3.10	Case Study: Did Archaea Cause the Permian Mass Extinction?	405
13.3.11	Bacteria	405
13.3.12	Case Study: Plague Epidemics	406
13.3.13	Viruses	407
13.3.14	Case Study: Rabbit Myxomavirus as a Population Control Method	408
13.3.15	Infectious Molecules: Viroids and Prions	409
13.3.16	Case Study: BSE	410
13.4	Microbes and the Earth System	411
13.4.1	Solid Earth (Geosphere)	411
13.4.2	Case Study: Anthrax From Melting Permafrost in Siberia	412
13.4.3	Atmosphere	412
13.4.4	Hydrosphere	414
13.5	Factors That Put Populations at Risk	415
13.5.1	Population Vulnerability	415

13.5.2	Population Density	415
13.5.3	Population Diversity	416
13.5.4	Hygiene and Sanitation	417
13.5.5	Poverty	418
13.5.6	Global Travel	420
13.5.7	Climate Change	420
13.5.8	Evolution of Organisms	420
13.6	Diseases in the Food Supply	422
13.7	Mitigation of Hazards	423
13.7.1	Sanitation	423
13.7.2	Hygiene	424
13.7.3	Food Safety	424
13.7.4	Vaccinations	424
13.7.5	Vector Control	426
13.7.6	Antibiotic Overuse Prevention	426
13.7.7	Quarantine	427
13.7.8	Culling as Disease Control	428
13.8	Conclusion	428
13.9	Chapter in Review	429

14 Hazards From Space 433

Kelli Wakefield and Joel Berrier

14.1	Space Hazards	433
14.1.1	Chelyabinsk, Friday, 15 February 2013, 9:20 YEKT (3:20 UTC)	433
14.2	Introduction	434
14.3	A History of Catastrophe	434
14.3.1	Asteroids	436
14.3.2	Comets	436
14.3.3	Meteorites	438
14.3.4	Near Earth Objects	444
14.4	Measuring Risk	445
14.4.1	Observed Collisions	445
14.4.2	Impact Craters	449
14.4.3	The Cretaceous Extinction	453
14.5	What Can We Do?	456
14.5.1	Kinetic Impactor	457
14.5.2	Gravity Tractor	458
14.5.3	Blast Deflection	458
14.5.4	Other Proposals	458
14.6	Solar Events	459
14.6.1	The Role of the Sun	459
14.6.2	The Sun's Anatomy	459
14.7	Earth's Future	463
14.8	Chapter in Review	463

Bibliography	467
