Preface

xxi

SECTION 1 Natural environment

1. Identification of geomorphic and morphotectonic features using geographic information system techniques	3
Kanella Valkanou, Efthimios Karymbalis and Konstantinos Tsanakas	
1. Introduction	3
2. Geomorphometry	4
3. Identification and mapping of landforms—specific geomorphometry	10
4. Morphometric indices of active tectonics	16
5. Conclusions	22
6. Key takeaway and future research	23
References	23
2. Monitoring snow by combining physical snow models and microwave remote sensing techniques: two case studies from northern Finland	29
Ioanna Merkouriadi and Jorge Jorge Ruiz	
1. Introduction	29
2. Materials and methods	32
3. Results and discussion	40
4. Conclusions	47
References	49
3. Is there any pure nature left? A geospatial analysis approach of perceived landscape naturalness	51
Antigoni Faka, Triantafyllos Falaras, Christos Chalkias, Apostolos G. Papadopoulos and Vassilis Detsis	
1. Introduction	51
2. Materials and methods	53
3. Results	59
4. Validation	61

5. Discussion	62
6. Conclusions	64
References	64
4. Spatiotemporal patterns of vegetation regeneration dynamics in a natural Mediterranean ecosystem using EO imagery and Google Earth Engine cloud platform	69
Ioannis Lemesios, Spyridon E. Detsikas and George P. Petropoulos	
1. Introduction	69
2. Study area	71
3. Datasets	73
4. Methods	73
5. Results	76
6. Discussion	85
7. Conclusions	86
References	87
5. Understanding and monitoring the dynamics of Arctic permafrost regions under climate change using Earth Observation and cloud computing: The contribution of EO-PERSIST project	91
George P. Petropoulos, Vassilia Karathanassi, Kleanthis Karamvasis, Aikaterini Dermosinoglou and Spyridon E. Detsikas	
1. Climate change and impacts	91
2. Arctic and permafrost regions and climate change	92
3. EO data for climate change available for the Arctic	93
4. Introducing EO-PERSIST (https://eo-persist.eu/)	96
5. Conclusions and future outlook	105
References	107

SECTION 2 Agricultural environment

6. Development of algorithms based on the integration of vegetation indices and meteorological data for the identification of low productivity agricultural areas	111
M. Lanfredi, R. Coluzzi, M. D'Emilio, V. Imbrenda, L. Pace, C. Samela, T. Simoniello, L. Salvati and J. Mughini Gras	
1. Introduction	111
2. Materials and methods	113

3. Methodology	116
4. Results	117
5. Conclusions	120
Acknowledgment	121
References	121
7. A comprehensive framework for multiscale soil erosion modeling: A case study of Pag Island, Croatia	127
Fran Domazetović, Ante Šiljeg and Ivan Marić	
1. Introduction	127
2. Methodology	130
3. Results	142
4. Discussion	149
5. Conclusion	153
References	154
8. Estimation of soybean productivity in a crop livestock integration system from orbital imagens and simplified triangle method	159
Gustavo Rodrigues Pereira, Daniela Fernanda da Silva Fuzzo, João Alberto Fischer Filho, Bruno Enrique Fuzzo and Gleyce Kelly Dantas Araújo Figueiredo	
1. Introduction	159
2. Triangle model and agrometeorological estimation of agricultural productivity	160
3. Simplified triangle method	162
4. Material and methods	162
5. Obtaining productivity in the field and acquiring data	163
6. Application of the simplified triangle method	164
7. Productivity estimate	165
8. Results evaluation	166
9. Results and discussion	168
10. Productivity estimate	170
11. Conclusion	172
Acknowledgments	172
References	172
9. Desertification risk in agricultural areas under current and future climate conditions—a case study	175
Nektarios N. Kourgialas	
1. Introduction	175
2. Methodology	176

3. Results and discussion	183
4. Conclusions	188
References	189
10. An evaluation of SMAP soil moisture product using in situ data and Google Earth Engine: A case study from Greece	191
Spyridon E. Detsikas, Triantafyllia Petsini and George P. Petropoulos	
1. Introduction	191
2. Experimental setup	193
3. Methodology	195
4. Results	196
5. Discussion	199
6. Conclusions	201
Acknowledgments	201
References	201

SECTION 3 Coastal/aquatic environment

11. Charting the changes: Geographic Information System and Remote Sensing study on soil erosion and coastal transformations in Maliakos Gulf, Greece	207
Nikolaos Stathopoulos, Kleomenis Kalogeropoulos, Eleni Vasileiou, Panagiota Louka, Demetrios E. Tsismelis and Andreas Tsatsaris	
1. Introduction	207
2. Data and methodology	210
3. Results and discussion	215
4. Concluding remarks	225
References	227
Further reading	230
12. Exploring aquatic environments through geographical information science: A comprehensive review and applications	231
Smrutisikha Mohanty, Md. Wasim, Prem C. Pandey and Prashant K. Srivastava	
1. Introduction	231
2. Role of GIS in environmental monitoring	232
3. GIS in water environment monitoring and risk assessment	233
4. GIS in coastal ecosystem management	242
5. Challenges and future recommendations	243

6. Conclusion	245
Acknowledgment	245
References	245
13. Assessing coastal vulnerability to climate change-induced hazards in the Eastern Mediterranean: A comparative review of methodological approaches	253
Dimitrios-Vasileios Batzakis, Efthimios Karymbalis and Konstantinos Tsanakas	
1. Introduction	253
2. Climate change impacts on coastal areas of the Mediterranean Sea	254
3. Revealing the vulnerability of the coastal areas during climate change	256
4. Assessing coastal vulnerability through index-based methodologies	257
5. Conclusion	273
6. Key takeaways	274
References	274
14. Advances in geographical information science for monitoring and managing deltaic environments: Processes, parameters, and methodological insights	279
Konstantinos Tsanakas, Efthimios Karymbalis and Dimitrios-Vasileios Batzakis	
1. Introduction—theoretical framework	279
2. Methodological approaches	281
3. Key takeaways	304
References	305
Further reading	311

SECTION 4 Urban environment

15. Dynamic modeling of urban hydrology in a geographic information system-setting with TFM-DYN	315
Andreas Persson, Petter Pilesjö and Abdulghani Hasan	
1. Introduction	315
2. Methods	318
3. Results	326
4. Discussion	329
5. Conclusion	334
References	335

16. Geospatial tools for cultural heritage education: innovations in teaching and learning through massive open online courses	337
Maria Pigaki and Carmen Garcia	
1. Introduction	337
2. The complexity of the teaching-learning process of cultural heritage	337
3. Theoretical and methodological framework	341
4. Planning a MOOC on geotechnologies for cultural heritage	347
5. Instead of an epilogue	353
Acknowledgments	353
References	354
Further reading	355
17. Urbanization trends from global to the local scale	357
Gourgiotis Anestis and Demetris Stathakis	
1. Introduction	357
2. Methods and materials	358
3. Results	358
4. Conclusion remarks	372
References	373
Further reading	375
18. Mapping and monitoring night light pollution	377
Chalkias Christos and Chrysovalantis Tsiakos	
1. Introduction	377
2. Data and methods for mapping night light pollution	378
3. Applications and case studies	383
4. Concluding remarks—Future research directions	389
References	389
19. Crowdsourcing applications for monitoring the urban environment	397
Mariana Vallejo Velázquez, Antigoni Faka and Ourania Kounadi	
1. Introduction	397
2. Monitoring physical aspects in urban environments	399
3. Monitoring social aspects in urban environments	403
4. Limitation and challenges	407
5. Conclusions	409
References	410

SECTION 5 Atmosphere/air environment

20. Revealing air quality dynamics: Leveraging remote sensing and GIS for active monitoring and risk evaluation	417
Hamaad Raza Ahmad, Khalid Mehmood, Saifullah, Sadia Bibi, Muhammad Hassan Bashir and Ayesha Siddique	
1. Introduction	417
2. Earth observation and GIS in science: Advantages and limitations	418
3. Air quality parameters used for air quality mapping	421
4. Remote sensing and GIS techniques used for air quality mapping	423
5. Conclusion	424
Funding	425
References	425
21. Spatial distribution of noise levels in the Historic Centre of Athens in Greece using geoinformation technologies	429
Avgoustina I. Davri, George P. Petropoulos, Spyridon E. Detsikas, Kleomenis Kalogeropoulos and Antigoni Faka	
1. Introduction	429
2. Experimental setup	431
3. Methodology	435
4. Results	439
5. Discussion	447
6. Conclusions	451
References	451
22. Exploring the effect of the first lockdown due to covid-19 to atmospheric NO₂ using Sentinel 5P satellite data, Google Earth Engine and Geographic Information Systems	455
Georgios Gkatzios, George P. Petropoulos, Spyridon E. Detsikas and Prashant K. Srivastava	
1. Introduction	455
2. Study area	459
3. Methodology	461
4. Results	465
5. Final remarks	471
References	472

SECTION 6 Natural disasters

23. Recent advances and future trends in operational burned area mapping using remote sensing	477
Alexandra Stefanidou, Dimitris Stavrakoudis and Ioannis Z. Gitas	
1. Introduction	477
2. Remote sensing in operational burned area mapping	478
3. Operational burned area mapping products	482
4. Challenges and future trends	488
5. Conclusions	491
References	491
24. Techniques and tools for monitoring agriculture drought: A review	497
Varsha Pandey, Prashant K. Srivastava, Anjali Kumari Singh, Swati Suman and Swati Maurya	
1. Introduction	497
2. Drought types and their propagation	499
3. Agriculture drought monitoring tools and techniques	502
4. Challenges and way forward	513
References	514
25. Exploring the use of random forest classifier with Sentinel-2 imagery in flooded area mapping	521
Cinzia Albertini, Andrea Gioia, Vito Iacobellis, Salvatore Manfreda and George P. Petropoulos	
1. Introduction	521
2. Methodology	523
3. Results	531
4. Discussion	535
5. Conclusions	537
Acknowledgments	538
References	539
26. Landslide susceptibility assessment and mapping in Breaza town, Romania	543
Ionut Sandric, Zenaida Chitu and Radu Irimia	
1. Introduction	543
2. Materials and methods	544

3. Landslide susceptibility assessment	546
4. Results and discussion	550
5. Conclusions	553
Acknowledgments	554
References	554
